

Emco Wheaton Corp., the inventor of DRY-BREAK™, is pleased to introduce the latest in DRY-BREAK™ technology. DRY-BREAK II™ means improved flow rates, reduced loss at disconnect, and full interchangeability with existing *Emco Wheaton* units.

J72 Adapter

- Enhanced poppet design allows for better flow characteristics in either direction
- Length: Adapter is 5% shorter than the previous style
- Weight: Adapter is the lightest on the market
- Forged Construction: Brass body and poppet or aluminum body and poppet
- Rear-entry design allows for easy field servicing

J72 Coupler

- Product loss on disconnect virtually eliminated
- Improved flow characteristics
- Easier connection and disconnection from adapter
- Coupler features identical components to existing *Emco Wheaton* units
- Serviceable with the *Emco Wheaton* Repair Kit Program
- New black hard coat anodizing
